

The Rise Of Astrology

Clara and Dylan

Does or Doesn't Relate To Their Zodiac

Participants: 31 people

Does Relate To Their Zodiac: 23 people

Doesn't Relate To Their Zodiac: 8 people

Ratio: 23 - 8

About Astrology

Astrology has impacted a lot of people's lives in different ways. It has become extremely relevant more recently and is influencing people's decisions in everyday life. We want to see how much of an impact Astrology has on everyday life and how it places itself in people's thought process. Along with that we want to see how people compare themselves to their Astrology sign and how the description of their sign is weirdly accurate and relates to them.

Our Goals

Our proposed outcome is to have the understanding of what makes people trust the system of Astrology so much, and how it has so much power in people's lives. We want the people that view our project to understand why people have such a close connection with their Astrology sign. We will demonstrate this by making a podcast, or poster and showing charts of information and evidence we have gathered on our case.
